

SAHIL SHEKH

AUTOMOTIVE DIAGNOSTIC & ELECTRICAL TECHNICIAN | FRESHER

8601600591 | shaikhsahilsiddiqui@gmail.com | Deoria, Uttar Pradesh

PROFESSIONAL SUMMARY

Entry-level Automotive Diagnostic & Electrical Technician with 6 months of hands-on automotive training in vehicle electrical systems, wiring, mechanical service, diagnostic scanning, sensor/actuator testing and ECM-related diagnostics. Also gained limited workshop practical exposure on routine vehicle service and electrical checks.

TRAINING

Trust Automobile — Car Mechanic & Car Wiring Training

Duration: 6 Months

Focus: Mechanical Systems | Automotive Electrical | Wiring | Diagnostics | ECM-related Systems

WORKSHOP PRACTICAL EXPOSURE

- Assisted with routine vehicle service and inspection.
- Practical exposure to automotive electrical testing and basic fault diagnosis.
- Assisted with brake, suspension and other routine service operations.
- Limited practical exposure to customer-vehicle electrical checks and workshop procedures.

AUTOMOTIVE DIAGNOSTICS

- DTC reading & clearing, live-data analysis, actuator tests, ECU/ECM identification and basic adaptation/calibration
- Wiring-diagram based circuit tracing, connector/pin identification and power/ground/signal testing
- Diagnostic scanner operation and practical electrical fault diagnosis
- Oscilloscope waveform testing for CKP/CMP and ABS signals

AUTOMOTIVE ELECTRICAL & WIRING

- Fuse and 4-pin/5-pin relay testing; supply, ground and control-side checks
- Headlight wiring with relay-based circuits; indicator/hazard wiring inspection
- Reverse-light circuit and switch/sensor testing
- Horn diagnosis, wiring repair and horn replacement on customer vehicles
- Wiper motor, washer system and multi-speed circuit testing
- Power-window motor/switch testing, including bypass/direct operation testing
- ORVM/folding-mirror connector and pin testing
- Ignition-switch B+, ACC, IGN and START circuit testing
- Central locking, push-button locking and actuator/circuit testing
- GPS tracker installation with B+, ACC and ground identification
- Dashboard/instrument-cluster dismantling and refitting

ENGINE ELECTRICAL / SENSORS

- VSS, CKP and CMP sensor testing
- Sensor connector, supply, ground and signal checks; practical testing exposure on other sensors
- ABS sensor testing, including oscilloscope signal checking
- Electric throttle-body removal/refitting, wiring/signal testing and adaptation/calibration
- IAC (Idle Air Control) valve practical checking/testing
- EGR valve, purge valve and actuator/solenoid testing
- 2/3/4-wire ignition-coil testing and step-up ignition system practical
- Fuel-pump connector, supply/ground, wiring and operation testing; ECM-controlled relay circuit checking
- Radiator-fan direct testing and ECM-controlled relay/signal diagnosis
- Glow-plug and glow-plug module/relay testing

MECHANICAL & SERVICE

- Complete car service including brake service and suspension/running-pad service
- Petrol and diesel demo-engine complete dismantling and reassembly
- Demo gearbox complete dismantling and reassembly, including shafts, gears, bearings, synchronizers and related components
- Wheel alignment, tyre balancing and tyre removal/refitting; 10 days of continuous practical practice
- AC service: compressor/clutch testing, gas filling, leakage testing, cooling-coil/evaporator and blower removal/testing
- DPF regeneration using diagnostic scanner
- Alternator and starter-motor dismantling, component inspection, reassembly and bench testing
- Alternator B+ output, ground, charging voltage, regulator and rectifier/diode testing
- Starter solenoid, terminal 30/50, ground and starting-circuit testing

KEY & SECURITY SYSTEMS

- Key programming/matching and immobilizer-related practical exposure
- Xhorse VVDI practical use
- Xhorse Panda practical use
- Key cutting and decoding using photo-based and conventional methods

PRACTICAL HIGHLIGHTS

- Complete petrol and diesel demo-engine dismantling/reassembly at component and fastener level.
- Complete demo-gearbox dismantling/reassembly with shaft, gear, bearing and synchronizer components.
- Wheel alignment and tyre-balancing practical work over 10 consecutive days.
- DPF regeneration and routine diagnostic-scanner work performed during training.

EDUCATION

12th Pass — Uttar Pradesh Board

PERSONAL DETAILS

Date of Birth	1 October 2004
Location	Deoria, Uttar Pradesh

DECLARATION

I hereby declare that the information provided above is true to the best of my knowledge and belief.
